Please note:

1) Mentioned power (Watt) applies to the COB only. The power consumption of the complete fixture will be 5-10% higher because of the power consumption of the driver*

*Additional power consumption depends on the type of driver

2) Power and Lumen/Watt (lm/W) can vary approximately 5%

3) The Meat Premium Red and Fresh Fish LED modules are high performance modules (non-Philips) with excellent colour rendering especially for food
